

Hüseyin Zeyrek

Computer Engineer

Work Experience

Software Intern

AFAD, Turkey's disaster management and International and organization:

July 2021 - August 2021 (30 working days) I wrote the initial parts of the mobile application of the AYDES project with React-Native language and delivered it to them. I also used the RSA encryption method in the project. During my internship, I learned about project management processes. It was an important benefit for me to decide to progress in the field of mobile programming.

Volunteer Software Developer

MAKU HAYTEK(Hayvancılık Sektöründe Dijital Teknolojiler O.U.A.M)

March 2022 - June 2023

- I am implementing the mobile application of the digitalization project of the certification process of the Standardization and Certification Center, which we are doing on behalf of the university, with React-Native language.

Volunteer Software Developer

Techcareer.net - FullStack Developer Bootcamp

September 2023 - still studying

- I have been taking React.js training in the front-end area and .Net training in the back-end area. This training helped me to have more knowledge about React and helped me to have knowledge in the .Net area.

Education History

Computer Engineering

Institution: Mehmet Akif Ersoy University

Year of Graduation: 2023
